(Thursday, 16:50, Session 31)

Computational Modeling Prizes

Four prizes worth \$1,000 each are awarded for the best full paper submissions to CogSci 2013 that involve computational cognitive modeling. The four prizes represent the best modeling work in the areas of perception/action, language, higher-level cognition, and applied cognition. These prizes are all sponsored by The Cognitive Science Society. The winners of the 2013 Computational Modeling Prizes are:

Perception/Action

Georg Layher, Martin Giese, and Heiko Neumann: *Learning representations of animated motion sequences - A neural model* (Saturday, 16:30, Session 95)

Language

Russell Richie, Charles Yang, and Marie Coppola: *Modeling the emergence of lexicons in homesign systems* (Thursday, 16:50, Session 29)

Higher-Level Cognition
